

## ELECTRICAL INSECT KILLER IK-8545

Please read carefully these instructions before use. The device is designed to offer the best possible efficiency at the lowest energy consumption and since it does not use chemicals or poisons, it is the best solution in eliminating those disturbing and some time dangerous flying insects.

### How it works:

1. The device does not use chemicals or poisons which can be dangerous to humans and pets!
2. The special UVA lamp (ultraviolet) with low consumption and long life is used to attract insects which are then instantly killed by the high voltage grid positioned in front of the lamp.
3. The device is designed to provide high efficiency with low energy consumption.

### Safety Instruction

- For household and indoor use only, not suitable for use in barns, stables and similar locations.
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance. The appliance is to be kept out of reach of children.
- Make sure that the appliance is not used in locations where flammable vapour or explosive dust is likely to exist.
- Do not use the power cord to pull the plug off or to carry the device.
- Do not make the power cord exposed to heat, oil and sharp edges. Damaged connection lines can cause fires, short-circuiting and electric shocks.
- Never remove any fixed parts of the appliance to make any internal adjustment to avoid electric shock. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Do not plug the device into the power source until the device is completely assembled after cleaning.
- The lamps in the appliance cannot be replaced from the user. Ask the manufactory or its service agent for help to change them with the approved lamps.

Indoor Use Only

Dangerous Voltage

### Usage and effective range:

1. The device can be used indoors only in residences, restaurants, hotels, offices etc.
2. The effective range of the device, under ideal conditions can reach to 40 square meters.
3. The most effective way to use it is to plug it in a wall outlet of a dark room, with no other light source, for about 20-30 minutes before you use that room. This way all flying insects will be killed. The effectiveness of the device is reduced if there is another light source in the room. If you like to hang it then you should do it near door or window, around 0.80 to 1.20 meters from the ground and at least 0.30 m away from the wall.

### **Maintenance – Cleaning - Safety:**

1. Before you plug in the device, make sure that the protective plastic grid is not broken or with openings big enough to allow children touching the high voltage grid.
2. Keep children and mentally impaired away from the device. Never touch the high voltage grid even after unplugging.
3. If the lamp flickers then it is possible that the voltage from wall outlet is not enough for the device to work! (220V AC)
4. In order to prolong the lamp life, do not switch on and off the device very often.
5. Do not use this device in places which explosives, flammable gasses or fumes may exist! Danger of explosion or fire!
6. In order to clean the device, please first unplug from wall outlet and discharge the high voltage grid by inserting a correctly insulated screw driver making sure not to touch the metal part of it. Then use the supplied small brush to clean the high voltage grid and a soft damp cloth to wipe the plastic exterior. Never immerse the unit into water or other liquids. You can remove the bottom tray by twisting it and then empty from insect remains.

### **Recycling Notice**

Your product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

### **Declaration of CE Conformity**

Herewith, KALLIOPI KARIDA & CO., LP. states that this product complies with the requirement of below directives:

EMC Directive: 14/30/EU

Low Voltage Directive: 14/35/EU

RoHS Directive: 11/65/EU & 15/863/EU

CE-marking Directive: 93/68/EEC

The detailed declaration of conformity can be found at [www.united-electronics.gr](http://www.united-electronics.gr)
